PROJECTS/EXPERIENCES

Bike Rental Management System
Full Stack Web Application | React.js, Node.js, MongoDB, Express.js   **Feb 2025 - April 2025**

- Developed a full-stack bike rental platform with features for bike browsing, reservations, and secure online payments (Card, COD, UPI).
- Designed an admin dashboard for managing bikes, users, and maintenance with real-time data updates.
- Implemented dual-role access control (User/Admin) and a damage reporting system for streamlined operations.
- Enhanced user experience with dark/light themes and ensured SSL-based data security across the platform.

Dice Game Simulator (Java Edition)
Desktop Application | Java, Swing, Object-Oriented Programming   **June 2024- July 2024**

- Developed an interactive multiplayer dice-rolling game using Java Swing, supporting 2–4 players with round-based gameplay and score tracking.
- Implemented core game logic including real-time tie detection, player win tracking, and multiple round support for enhanced replayability.
- Packaged the application as a runnable .jar file for seamless execution across platforms without additional setup.
- Designed an intuitive graphical user interface (GUI) ensuring an engaging and user-friendly desktop gaming experience.
