Email: thakurssanjali@gmail.com

Mobile: +91-9149404876

SKILLS

Languages:	C++, Java, Python, JavaScript, PHP
Frameworks:	React.js, Next.js, Node.js, Express.js, REST APIs, Tailwind CSS
Databases & Tools:	MongoDB, MySQL, Firebase, Git, Docker, Vercel
Core Skills:	Data Structures & Algorithms, OOP, DBMS
Soft Skills:	Problem-Solving, Rapid Adaptability, Strong Work Ethic, Self-Driven Learning

PROJECTS

- **HiClippy – Online Clipboard & File Sharing Platform | [Link](#)** Sep'26
 - Developed a full-stack clipboard and file-sharing platform using React, Node.js, Express.js and MongoDB, enabling users to share text, images, GIFs, links and files through unique 4-digit codes without account creation
 - Implemented configurable data expiration using MongoDB TTL indexes, automatically removing shared content across 1-minute to 24-hour lifecycles, with file handling, payload validation and Docker/Nginx deployment
- **CampusQuest – AI-Powered Campus Scavenger Hunt Platform | [Link](#)** May'26
 - Created a full-stack campus scavenger hunt platform using React, Laravel, PostgreSQL and Supabase, enabling users to discover challenges, submit photo-based proof and compete through real-time leaderboards
 - Integrated a Gemma-powered vision service with asynchronous processing to validate photo submissions against quest requirements, using JWT authentication, query caching and optimized image delivery.
- **Velo Rapido – Bike Rental Management System | [Link](#)** Apr'25
 - Designed a full-stack bike rental platform using PHP, MySQL, Tailwind CSS and JavaScript, enabling users to browse, filter and reserve bicycles, scooters and motorcycles with account-based booking management
 - Implemented role-based customer and admin workflows for reservations, payments, fleet management, maintenance and damage reporting, connecting 6 core database entities to manage the rental lifecycle

TRAINING

- **Cipher Schools – EdTech Company | [Link](#)** Jul'26 – Aug'26
Data Structures & Algorithms using Java
 - Completed 70 hours of hands-on training in Java, covering OOP, arrays, linked lists, stacks, queues, trees, recursion, and core problem-solving techniques
 - Implemented 100+ DSA problems to strengthen algorithmic thinking, data structure manipulation, and coding efficiency across progressively challenging problems
 - Applied OOP, recursion and core data structures through implementation-based assessments and coding exercises covering progressively challenging problems

ACHIEVEMENTS

- **HackerRank Badges** — Earned multiple badges on HackerRank including C++, Java and Python
- **Hackathon Qualification** — Achieved a rank under top 5 teams in University Level Hackathon

CERTIFICATES

- Industry-oriented Program Of DSA, Cloud Computing & DevOps | Cipher Schools | [Link](#) Aug'26
- Cloud Computing | NPTEL | [Link](#) Apr'25
- Computer Communications Specialization | Coursera | [Link](#) Oct'24

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science & Engineering; CGPA: 7.41 Aug'23 – Present
- **S.P. Smart School** Jammu, Jammu & Kashmir
Intermediate; Percentage: 92 Apr'22 – Mar'23
- **Raja New Light** Sunderbani, Jammu & Kashmir
Matriculation; Percentage: 91 Apr'19 – Mar'20
